WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

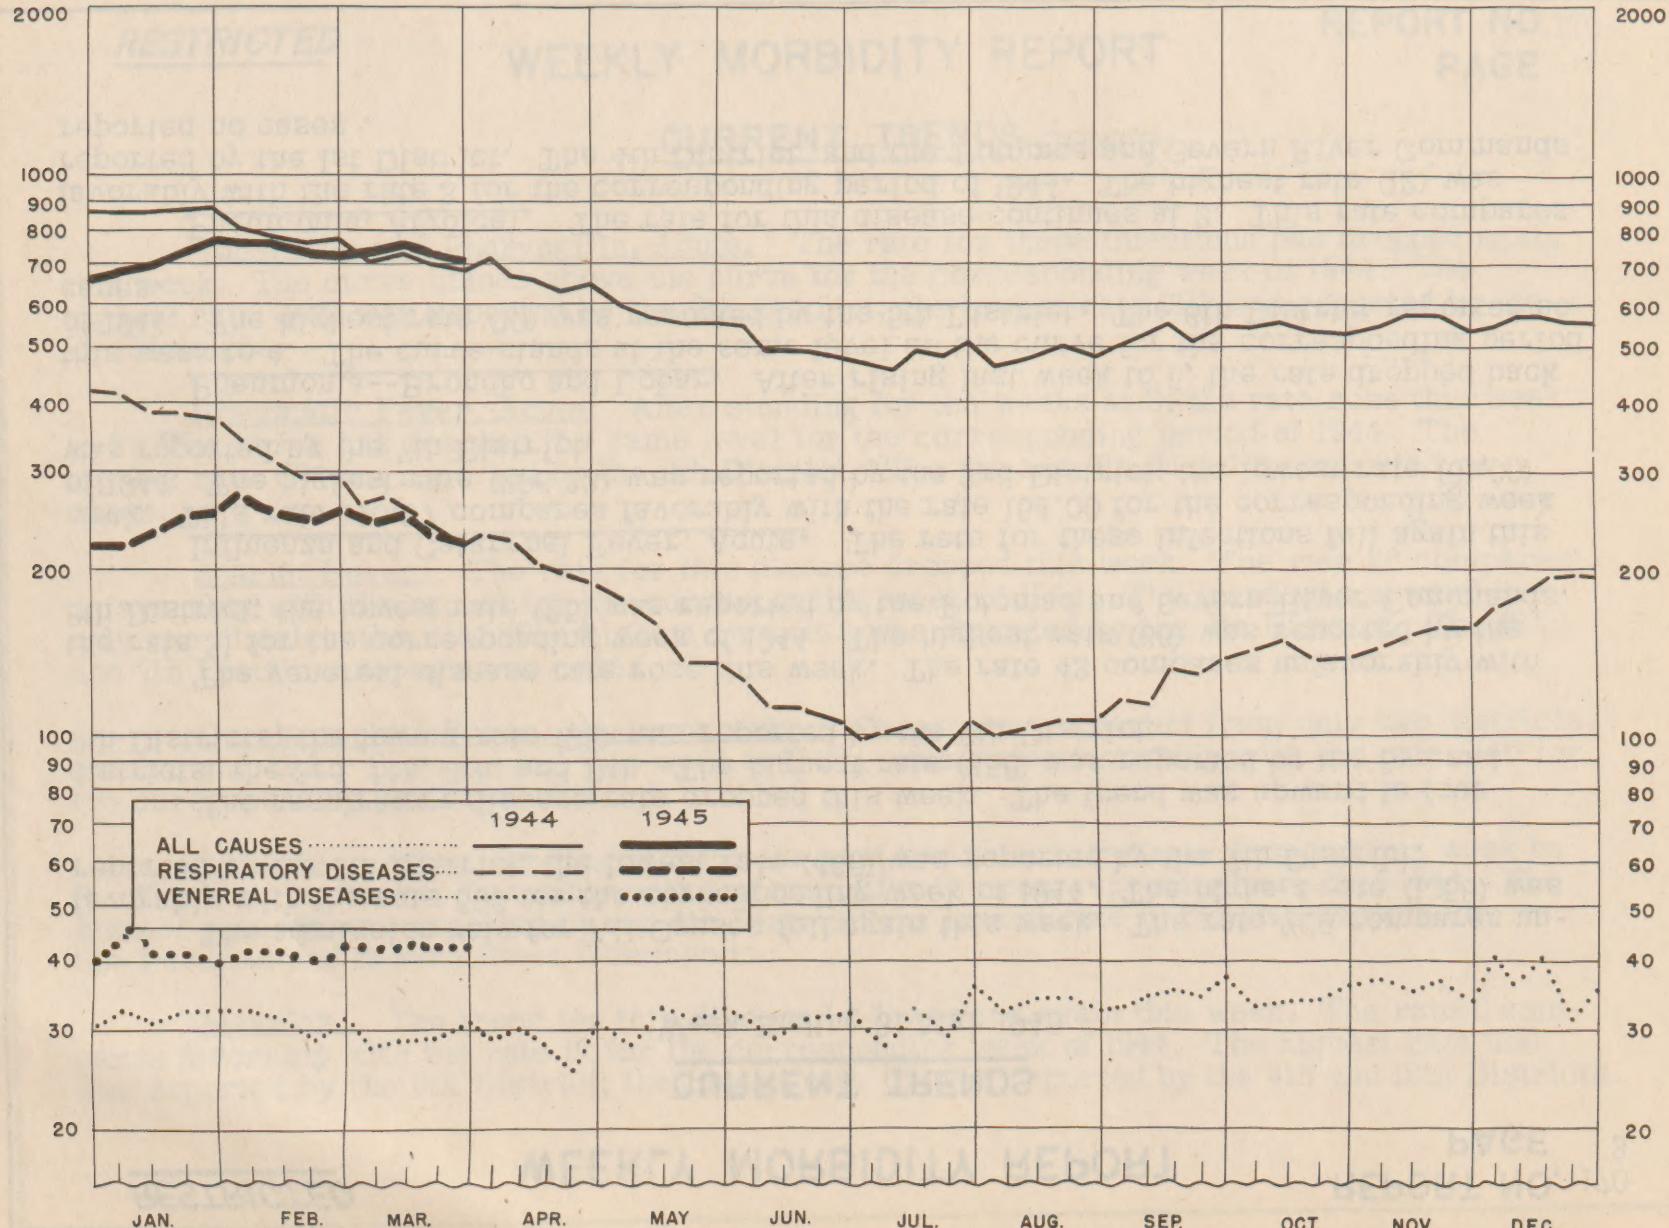

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

CURRENT TRENDS

Week Ending 31 Mar 1945

The admission rate for All Causes fell again this week. The rate 709 compares unfavorably with the rate 696 for the corresponding week of 1944. The highest rate (1058) was reported by the 9th District; the lowest rate (465) was reported by the 7th District.

The respiratory disease rate dropped this week. The trend was upward in four districts, the 3rd, 5th, 8th, and 11th. The highest rate (356) was reported by the 3rd and 9th Districts; the lowest rate (95) was reported by the 7th District.

The venereal disease rate rose this week. The rate 43 compares unfavorably with the rate 31 for the corresponding week of 1944. The highest rate (66) was reported by the 8th District; the lowest rate (25) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The rate for these infections fell again this week. This rate 140.37 compares favorably with the rate 154.00 for the corresponding week of 1944. The highest rate (296.33) was reported by the 3rd District; the lowest rate (61.00) was reported by the 7th District.

Pneumonia--Broncho and Lobar. After rising last week to 5, the rate dropped back this week to 4. The curve stands at the same level as the curve for the corresponding period of 1944. The highest rate (19) was reported by the 5th District. The 6th District reported no cases.

Pneumonia, Atypical. The rate for this disease continues at 2. This rate compares favorably with the rate 3 for the corresponding period of 1944. The highest rate (12) was reported by the 1st District. The 4th District and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections has dropped again this week. The curve stands above the curve for the corresponding week of 1944. The highest rate (190) was reported by the 9th District; the lowest rate (31) was reported by the 7th District.

Rheumatic Fever, Acute. After standing for ten weeks at 2, the rate rose this week to 3. The curve has reached the same level for the corresponding period of 1944. The highest rate (9) was reported by the 9th District. The 4th and 7th Districts reported no cases.

Scarlet Fever. The rate for this disease dropped this week. The rate 26 compares unfavorably with the rate 11 for the corresponding week of 1944. The trend was upward in only one district, the 11th. The highest rate (110) was reported by the 9th District. The 6th and 7th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. Cases were reported from only two districts, the 3rd and 12th. The rate fell this week to 0.07; comparing favorably with the rate 0.46 for the corresponding period of 1944.

Malaria. After standing at 3 for the past two weeks, the rate dropped this week to 2. This rate compares favorably with the rate 3 for the corresponding period of 1944. The highest rate (9) was reported by the 4th District; the lowest rate (0.60) was reported by the Potomac and Severn River Commands.

Measles. The trend for this disease is downward again this week. The rate 8 compares favorably with the rate 17 for the corresponding week of 1944. The highest rate (29) was reported by the 9th District; the lowest rate (2) was reported by the 4th and 13th Districts.
